WHAT'S IN A DATE?

Even for those who aren't very spiritual, choosing a wedding date can feel like testing fate. Your natural instincts might see you pick an anniversary or a date with your favorite number in it. Likewise, dates that tend to remind you of negative occasions are dates that people steer clear of. In any case, dates with repeating numbers tend to stand out. And according to numerology, that's because these patterns hold spiritual significance.

Repeating numbers often pop up in ways

that seem to transcend coincidence, they're called angel numbers in numerology.

The number **TWO** signals a relationship between one person and another—the collision of two ones. As a result, this day is all about partnerships.

In numerology, **FIVE** is often associated with signifies movement and transformation.

So we thought, why not!? Let's celebrate that and help three beautiful couples seal their partnership on Thursday 25.9.25!
